

Sales Data Analysis Report

ApexPlanet Internship - Task 5

Executive Summary

This project analyzes the Sample Superstore dataset to identify sales trends, profit patterns, and business opportunities. Various data analysis and visualization techniques were used to generate meaningful insights and support business decision-making.

Key Insights and Recommendations

Top 5 Insights

1. Technology category generated the highest sales.
2. Office Supplies category showed stable performance
3. Some regions contributed significantly higher profits.
4. Certain products generated high sales but low profits
5. Sales showed seasonal variations across months

Business Recommendations

1. Focus marketing efforts on Technology products.
2. Improve profitability of low-margin products.
3. Optimize inventory based on seasonal demand.
